Representative . . . NOW

We want to take this opportunity to thank our many Friends for their fine support in the past.

We had to stop our salesmen from taking orders early in the season on some varieties and on all varieties long before the season was over.

Now we are going all out this year in trying to increase our supply so that we can supply the demand, but it is a fact that the first order gets the choice grades and variety.

Our popular prices still prevail.
