Soil and Water Stewardship week begins April 28

The National Association of Conservation Districts is marking the annual Soil and Water Stewardship observance April 28-May 5.

This year's theme is "Harmony: People and Places." It is modeled on a definition of conservation stated by Aldo Leopold, an early American conservation leader. He said, "Conservation is a state of harmony between men and land."

To order informational materials, contact the Black Hawk Soil and Water Conservation District at 296-3262.
