

More Bench Type Terraces Constructed

Work was completed last week on 2,000 feet of bench terraces on the John Butler farm, located just across the road from the Pine Lake Country Club Golf course. The new type terraces are the third of that kind to be placed in the

Pine Lake watershed. Paul Primus, who operates the Butler farm, and John Janssen in Grundy county have already installed the new terraces. Work is presently underway on 13,000 feet of bench type terraces on the Joe Beach farm in the Pine

Lake watershed. Constructing the terraces on the Butler farm was Merrill Wiechmann of Hubbard with Shore Construction of Eldora building the intakes and doing the tiling.
