

CRP sign-up

8-18-88

by Randy Phelan, District
Conservationist

The seventh Conservation Reserve Program is receiving excellent participation. The seventh sign-up has been extended until Wednesday, August 31st.

To date 44 bids have been let to enroll 2700 acres into the ten year program.

Producers are selecting the CRP for two reasons. One, the

CRP program provides a guaranteed high cash rent for ten years. Two, the CRP seeds these highly erodible acres and maintains the producers eligibility for ASCS farm programs.

If you have not checked into the Conservation Reserve Program I'd recommend you have ASCS develop crop history to determine if CRP is an option for your highly erodible acres.
