

We should ...
 (Continued from page 1)
 ... that we should be doing more to protect the land. The idea was to have a conservation easement on the land, but the owner wanted to keep it in agriculture. The idea was to have a conservation easement on the land, but the owner wanted to keep it in agriculture. The idea was to have a conservation easement on the land, but the owner wanted to keep it in agriculture.

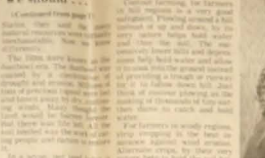

SOME PEOPLE say that owning farmland is not of value. However, the owner of this farm says it is worth the investment in his land.

TERACE means contouring the land. The owner of this farm says it is worth the investment in his land.

TERACE means contouring the land. The owner of this farm says it is worth the investment in his land.

The land is Iowa's natural heritage.

Oelwein State Bank has made the commitment to conserving our heritage by working with Northeast Iowa farmers and as a member of the Fayette County No-Till Association. Soil conservation is essential to everyone concerned with agriculture. The soil is a resource we must protect, now and in the future. Oelwein State Bank's commitment to soil conservation was made to those who passed the land to us and we reaffirm our commitment to the present custodians and to those that the land will pass to in the future.

Where Banking is a solution, not a problem

Winning Prof.

Iowa Masters Corn Growers Contest Winners

DEKALB-PFIZER GENETICS congratulated these Iowa top growers. They are winners in the 1981 Iowa Masters Corn Growers Contest. They made the right decision with a prize of \$100,000 from DEKALB-PFIZER GENETICS. But, we're more proud of the growers who plant these. Congratulations. You planted great, not profits.
