Soil & Water Conservation Annual Report

CRP Update

We are finishing up working with landowners that enrolled in the 2010 general CRP sign-up.

We had about 30 new contracts start this fall. Rumor has it there will be another sign-up for 2011. Watch for an announcement soon if the rumor holds true.

Recently we lost a very popular continuous practice. Approval of any new wetland restoration (CP-23) applications has been discontinued. We are waiting for more information on this and are hopeful it will be re-instated.

We will soon be working on contracts that will expire in 2011, and be re-enrolling them for another 10-15 years. You should be receiving notice if you have acres expiring. All re-enrollments will be required to perform mid-contract management on those acres to improve wildlife habitat. Cost share is approved to help with costs of mid-contract management activities.

Please contact our office if you are planning mid-contract management activities this year. If you are considering a burn on your CRP acres a burn plan is required to receive cost share. We will be happy to assist you with this or any other concerns you may have.

Tama County Humane Society's Pet of the Week

Cats And Kittens looking for forever homes!!! Come see them at the TCHS! \$30.00 brings home your new best friend!

Visit the Tama County Humane Society on Saturdays from 9 am - Noon 1406 E. 5th St., Tama or call 641-691-7676 to make an appointment

Tama County 4-H Conservation Project Winners

LEFT: Winners of 4-H Awards for Conservation projects were (left to right, front) John Dvorak, fish - wildlife, Tessa Dvorak, agriculture - natural resource and Hunter Filloon, fish - wildlife. (Left to right, back) Tyler Wrage, fish - wildlife, Emma Knoop, agriculture - natural resource, Erin Filloon, conservation and Allen Heise, fish - wildlife.

Can conservation wait?

By Jim Gillespie

In this ever changing world and state, what does the future hold for conservation and agriculture? Commodity prices are high, land values are high, rents are high, inputs are high, and the list goes on.

But can conservation of the soil and water wait? That has to be a good question everyone should be thinking about. With more demands being placed on soil and water resources to produce more food for an ever growing population in the world and with changing technology and genetics to allow different forms

of production in agriculture CONSERVATION CAN NOT WAIT.

Every land owner and farm operator should take the time to contact their local Soil and Water Conservation District and USDA Natural Resources Conservation Service office to see what they can do for conservation on their land. Look at this as an opportunity to protect the land that is the basis of your farming business.

Everything that comes from your operation depends on the land that you own or operate. You are left to manage your land as

well as you can to be as productive as possible. But you will need the soil and water resources that you have for a long time, so protect them so they can support your operation well into the future.

Consider practices such as residue management, structural practices, and nutrient management to

protect the productivity of your operation as well as protect water quality. Keep your valuable soil in place to maintain good soil quality that will enhance and maintain production.

Control the water that falls on your land by reducing compaction and try to absorb as much as possible to reduce runoff.

Water is valuable to production and protection, so try to use it so that it will be available when needed by the plants.

When you look at the definition of "Conservation" in the Webster's Dictionary it states "a careful preservation and protection of something; esp: planned management of a natural resource to prevent exploitation, destruction, or neglect". That says a lot and gives us all a large responsibility.

Accept that responsibility and put CONSERVATION at the top of your business plan. Be the best land and farm operator you can be and conserve your soil and water resources so your agricultural operation will maintain itself for a long time.

Union Grove Lake watershed time running out

Scheduled to end in June 2011, the Union Grove Lake Watershed Project is in its third and final year. What does this mean for the installation of new conservation practices in the watershed?

While there is no guarantee with Union Grove, in most other expiring water quality projects, conservation practices under construction when the project expired were able to have their completion dates extended for a short period of time.

Time is running out to sign up for cost-sharing conservation practices through the Union Grove Lake Watershed Project. Now is the time to take advantage of these great cost-share rates!

We Salute the Tama County Soil & Water Conservation District and the conservation efforts of the landowners in Tama County

Ansel is new Soil Conserv. tech in Tama County

Jeremy Ansel

My name is Jeremy Ansel and I am the new Soil Conservation Technician for the Toledo field office.

I have been currently working in Toledo for nearly six months now and plan on being in Tama County for a couple years. I am originally from Dubuque where I graduated high school at Dubuque Senior in 2002 and participated in football, wrestling, track and baseball.

I also participated in Boy Scouts and achieved the rank of Eagle Scout. I come from a decent sized family. I have two brothers and two sisters, plus I am a triplet.

For my college education
See ANSEL, page 8

Hillary Olson

Olson serves as Soil Conserv. Tribal Liaison

I grew up on a grain and farrow-to-finish hog farm in Story County.

I graduated from Iowa State University with a bachelor's in Animal Science and a master's in Soil Science. My husband and I have a row crop operation and cow-calf herd.

In the past, I have worked as a student trainee and soil conservationist in Story, Allamakee, Butler and Boone counties.

I left the Iowa Water Center at Iowa State University in June 2010, to accept the Soil Conservationist/Tribal Liaison position in Tama.

I've enjoyed being back out in the field and working with producers.

RIGHT-
Chuck and Cathy Thompson and Yvonne and Bill Fry representing Lake and Park Holding Corporation, Gladbrook, winner of the Friend of Conservation award.

Grocery Sack Contest

Grocery sack: The theme of this year's Soil & Water Stewardship Week was Conservation Habits = Healthy Habitats. Working to improve our environment, you can develop good habits that will last a lifetime and will inspire others around you. Develop conservation habits so that they become second nature and benefit healthy habitats.

This year's countywide winner was Abbie Parizek, who was a 4th grader last spring at South Tama Elementary. This past summer, she got to enjoy a plane ride over the Tama County countryside, courtesy of Gary Brandenburg, retired conservation board director from Marshall County.
