LEGEND: SCS and county representatives are inspecting the recently completed B-9 road and floodwater retarding structure. This is the first watershed structure on farm to market road in Appanoose County. It has an 18" corrugated metal pipe head inlet and 22,225 cubic yards of fill. The photo was taken from the bottom of the excavation on the inside face of the road fill and 10' berm of the dam. The County Engineer, Randy Murdock, was project officer and Joe Calgan was SCS representative.
