

Orcutt's hotel was right against the store & office. It was a square house -
You can see the post of the porch of the hotel. The building on the
the reflection of building you see in the store window is a building on the
Railroad right away which Dättinger mentioned. All the land on the north of the Railroad
was leased from the C. B. & Q. railroad thro the East end of town.
The building on the right was a livery stable till about 1919 or perhaps
earlier
