WHY finer chopping

SILLO SPACE COSTS MONEY! GEHL owners will tell you that the *finer chopping* of the famous Gehl flywheel cutting mechanism makes it possible to store up to 50 more tons—**FIVE MORE ACRES**—in their silos.

Clean cut GEHL silage settles faster, packs tighter, keeps better... makes every foot of your silo pay off in bigger milk checks, better beef gains.

Five acres left in the field is money lost! Put your farm on a profitable, one-man forage harvesting program with a low-cost Gehl 2-Row "Chop-All." Let us show you why *Gehl gives you more chopper per dollar!*

Come in and see them.

ELECTRICAL POWER

for future farmers
for the farmer's future

Tomorrow's young farmer steps into an era
of unheralded advancement in farm uses of elec-
tricity.

For him, electrical power stands ready to shoulder many of the
responsibilities on which the security of his future
will depend.

For you, electrical power is that silent crew of many "hired
men" that even today is greatly easing the labor load
and adding convenience unlimited to you and your
family.

WILLIE WIREHAND AND THE FOLKS AT

THE HARDIN COUNTY

Rural Electric Co-operative

Believe In Soil Conservation

It is important to put electricity to its best uses on the farm. It is
just as important to practice soil conservation. Farming today re-
quires planning. It means planning your electrical system so that
it will do the most for you. It means planning your crop rotation
so that your farm land itself will do the most for you. DON'T LET
EROSION STEAL YOUR TOP SOIL. DON'T LET POOR WIR-
ING STEAL YOUR KILOWATT HOURS.
