

## **McCARTY REPORTS ON THE PINE LAKE WATERSHED**

Chuck McCarty, Hardin county work unit conservationist, reported to the Farm Bureau board of directors on progress and activities concerning the Pine Lake watershed located in Hardin and Grundy counties.

The watershed was established for the purpose of controlling water runoff and loss of soil. This proved to be a very interesting topic and the project will be just as interesting to follow.

If everything goes according to plans projected by the watershed board, there will be many new and proven applications of conservation applied.
