

MILLS COUNTY
FLOOD CONTROL COMMITTEE
MALVERN, IOWA.

To whom it may concern:

For many years the farmers operating rich agricultural land in the West Nishnabotna Valley of Mills County, Iowa, have suffered extremely heavy agricultural losses from floods, the eroding channel of the West Nishnabotna River has taken large blocks of valuable farm land, roads and bridges have been destroyed, and large amounts of food stuffs have been destroyed.

Whereas the farmers in such area have exhausted their individual means of control, and have recognized the need for an overall flood control program, and as a preliminary plan for such control was made in 1948, such plan now being a part of the Missouri Valley Flood Control Report.

Therefore, be it resolved that the Mills County Flood Control Committee in duly called meeting, petition that the Missouri Valley Flood Control Report be submitted to Congress at once.

Be it further resolved, that we request our Congressman and Senators to exert every effort to secure early approval and necessary appropriations to start the flood control program in the Nishna Valley.

Approved in called meeting of the Mills County Flood Control Committee this second day of April, 1949.

F. R. Chantry
F. R. Chantry
Chairman
Malvern, Iowa.

J. M. Steele
J. M. Steele
Secretary
Malvern, Iowa.
