

3 Semester Hours

Teachers obtain 3 semester hours of college credit for completion of each 3-week session. A total of 6 hours of college credit may be earned by attending two sessions. Both courses are acceptable as natural science requirements for a teaching certificate.

Modern facilities and recreational opportunities give this summer school a vacation-like atmosphere. Fishing, swimming and boating may be enjoyed on the 27-acre lake. Visitors are welcome and there are picnic facilities available to them.

Tuition for each session is \$36 for undergraduates and \$42 for graduates. Other expenses for those attending include \$58.54 for board and room. Scholarships are available through your Soil Conservation District and also through Iowa State Teachers College for those interested in attending.

FOR FURTHER information pertaining to scholarships and registration, contact the Soil Conservation District office, Post Office building, Eldora.
