HOW TO USE THIS RURAL RESIDENT AND PLAT DIRECTORY

This directory contains two kinds of information: 1) the rural residents and the locations of their dwellings, and 2) land ownership, or "plat" maps.

RURAL RESIDENT MAPS (R.R.) are on the right-hand pages and show each township with small squares to indicate dwellings. Each resident's name appears next to the small square. The rural resident alphabetical listing provides the resident's name, owner or renter status, township and section of residence, post office and route, and telephone number.

PLAT MAPS (PLAT) are on the left-hand pages and show each township with landownership boundaries of parcels other than small lots. The landowner's name or the contract purchaser's name as indicated by the abbreviation (L.C.) - appears within each land boundary.

The Landowner/Plat alphabetical list shows the landowner or the contract purchaser, and the township and section in which the land is located.

The plat information was compiled by researching the courthouse records to determine ownership of land as it is legally recorded. Every effort has been made to assure completeness and accuracy. Due to continual sales and transfers it is impossible to guarantee 100% accuracy, and we cannot accept responsibility for errors and omissions. We will appreciate being notified of discrepancies.

RURAL RESIDENT MAPS ARE ON RIGHT-HAND PAGES: PLAT MAPS ARE ON LEFT-HAND PAGES

HOW TO READ YOUR DIRECTORY & PLAT

HOW TO READ YOUR DIRECTORY

Rural residents' names are listed alphabetically by last name followed by first name or initial, "O" or "R" for owner or renter, name of the township and section in which they live, post office address, route number, and telephone number.

Following is an example of the method used:
Wood Jerry O Bent. 6 Medi. 1 394-3367
(Last Name)(First Name)(O or R)(Twp. No.)(Sec. No.)(P.O. Add.)(Rt. No.)(Tele. No.)

* . . .County Seat

Two different abbreviations are used for some towns in this directory. In the alphabetical listing, the first 4 letters of the town name are used. On the township maps, the first 3 letters are used to abbreviate.

HOW TO READ YOUR PLAT

The plat maps show the ownership information, the boundaries of the owner's land and the acreage. The INDEX TO OWNERS in the back of the book lists every land owner whose name appears on the township maps. The owners are listed alphabetically by last name, the first name or initial, followed by township name and section number that their land is in.

KEY

et.al.	Means "and others"	↘	Means "same owner for both parcels"
et.ux.	Means "and wife"		
et.vir.	Means "and husband"	Est.	Means "Estate"
L.C.	Means "Land Contract" or "Contract Deed"	L.E.	Means "Life Estate"
		Tr.	Means "Trust"

YELLOW SPRING TWP.

BENTON PLAT

HURON TWP.

FRANKLIN TWP.

JACKSON TWP.

The map displays a grid of land sections, each identified by a number (1-36). Various landowners are listed within these sections, often followed by their acreage. For example, in the top left, James & William R. King own 64 acres, and Ralph & Rita Heckenberg own 77.52 acres. In the center, Marlon & Mildred Andries own 105.79 acres. The map also shows several larger parcels, such as 338.58 acres owned by Yellow Spring Farms Inc. and 293.15 acres owned by Craig Murguia. Other notable features include the 'KINGSTON' area in the upper right, the 'Burlington Bank & Trust Co.' in the middle right, and the 'Howard Rice' area in the lower right. The map is bordered by Yellow Spring Twp. to the north, Huron Twp. to the east, Jackson Twp. to the south, and Franklin Twp. to the west.

A GUIDE TO LAND DESCRIPTIONS

Land Description: A description of a tract of land in legally precise terms, to show the exact location of the tract and the number of acres it contains.

TABLE OF LAND MEASUREMENTS

SQUARE MEASURE

144 sq. inches.....	1 sq. ft.	43560 sq. ft.....	1 acre
9 sq. ft.....	1 sq. yd.	640 acres.....	1 sq. mile
30½ sq. yds.....	1 sq. rod	1 sq. mile.....	1 section
16 sq. rods.....	1 sq. rod	36 sq. miles.....	1 township
1 sq. rod.....	272¼ sq. ft.	6 miles sq.....	1 township
1 sq. chain.....	4356 sq. ft.	208 ft. 8 in. sq.....	1 acre
10 sq. chains.....	1 acre	80 rods sq.....	40 acres
160 sq. rods.....	1 acre	160 rods sq.....	160 acres
4840 sq. yds.....	1 acre		

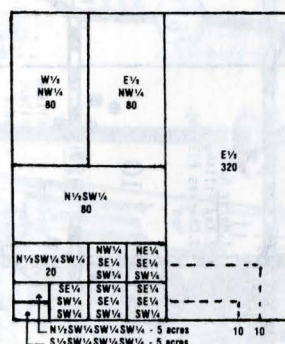

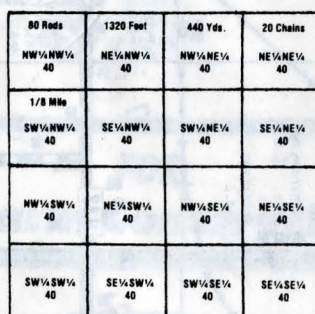

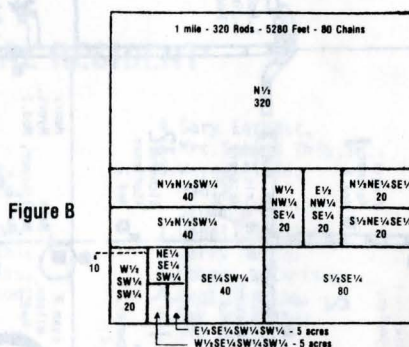

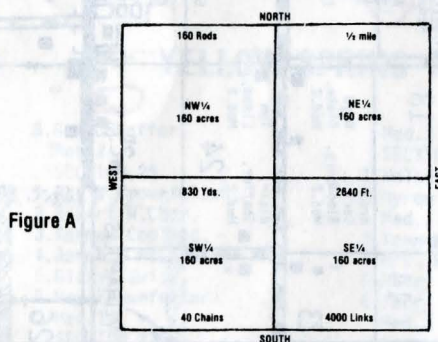

In rectangular land descriptions, square measure is expressed in terms of acres, and the location expressed in terms such as S½ (south one half), NW¼ (northwest one quarter), etc. as illustrated below.

LINEAR MEASURE

1 inch.....	.0833 foot	16½ feet.....	1 rod
7.92 inches.....	1 link	5½ yards.....	1 rod
12 inches.....	1 foot	4 rods.....	100 links
1 yard.....	.36 inches	66 feet.....	1 chain
2¼ feet.....	1 vara	80 chains.....	1 mile
3 feet.....	1 yard	320 rods.....	1 mile
23 links.....	16½ feet	8000 links.....	1 mile
25 links.....	1 rod	5280 feet.....	1 mile
100 links.....	1 chain	1760 yards.....	1 mile

In non-rectangular land descriptions, feet or rods are usually used to describe distance, and acres are usually used to describe square measure. These are called **Metes and Bounds Descriptions**; a detailed explanation follows.

HOW TO READ AND INTERPRET RECTANGULAR LAND DESCRIPTIONS

READ LAND DESCRIPTIONS FROM RIGHT TO LEFT (from the rear to the front)

Example: Under Figure C, the second description reads: W½, SE¼, SW¼ - 5 acres. The last part of the description states "SW¼", meaning that the tract is somewhere in that quarter (see Figure A). Next part to the left of that is SE¼, meaning that the tract is somewhere in the SE¼ of the SW¼ (see Figure B). Next, it says the W½, which means the tract is in the W½ of the SE¼ of the SW¼. (see Figure D). The final part (the first part when reading left to right), is the W½ of the above, leading us directly to the tract described by the entire description (see Figure C).

Land Descriptions always read from either the North or South **First**.

They always start with N or S, such as SE, NW, and so on. (Never WN or ES, etc.)

PLEASE NOTE: It is fairly easy to understand a land description, and to quickly locate a tract of land, even from a long description. The **KEY** is to read the description from right to left, or from back to front.

HOW TO READ AND INTERPRET METES AND BOUNDS DESCRIPTIONS

A **Metes and Bounds Description** starts at a given point, runs so many feet a certain direction, and then so many feet in another direction, and so on, until it arrives back at the starting point. **EXAMPLE:** In Figure E, note the small tract outlined. Here is a typical metes and bounds description: "Begin at the center of the section, thence north 660 feet, thence east 660 feet, thence south 660 feet, thence west 660 feet back to the point of the beginning, and containing 10 acres, being a part of Sec. No.etc." **PLEASE NOTE:** To locate a tract using a metes and bounds description, start at the point of beginning and follow -- **do not read it backwards** as you would a rectangular description.

In many cases, a tract may be described in different ways. That same tract located above by metes and bounds description can also be described as the SW¼ SW¼ NE¼ of the section. The rectangular system, explained above is the simplest and should always be used when possible.

HOW TO READ AND INTERPRET LAND DESCRIPTIONS WRITTEN IN TERMS OF DEGREES

A circle contains 360 degrees. Starting at the center of a circle, there are 360 straight lines an equal angle from each other, running from the center of the circle to the edge of the circle. The difference of direction from one line to the next is exactly one degree. Degree readings are not a measure of distance. they show only the direction a line runs from a given point.

In Figure F, the north-south and east-west lines divide the circle into four equal sections, each containing 90 degrees. Four other lines have been included, each with the number of degrees it varies from north or south (Important: all descriptions read from either north or south). The direction "Northwest," which is half way between north and west, reads north 45 degrees west.

Example:

In Figure F, there is a small tract in the south east quadrant. Here is the metes and bounds description for the tract: "Beginning at the point of beginnings, thence N 20 degrees west -200 feet, thence N 75 degrees east - 1320 feet, thence S 30 degrees east - 240 feet, thence 45 degrees west - 420 feet, thence west - 900 feet back to the point of beginning, containing so many acres,.....etc."

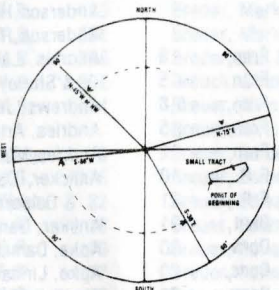

Figure F

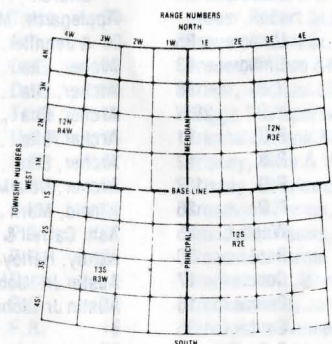

THE TOWNSHIP/SECTION LAND SURVEY SYSTEM

6	5	4	3	2	1
7	8	9	10	11	12
18	17	16	15	14	13
19	20	21	22	23	24
30	29	28	27	26	25
31	32	33	34	35	36

How Sections are numbered
in a township

A Congressional
Township = 36 Sections
of Land
1 Mile Square

A Civil or Political
Township May Be
Smaller or Larger
Than A
Congressional Township.

Township and Range Numbers

WHAT IS A TOWNSHIP?

When the new territories of the U.S. were surveyed many years ago, a township system was devised. A township, in theory, is a square tract of land 6 miles square, with 36 sections (each a mile square). The government engineers who surveyed the land knew that as they surveyed toward the north pole, it was impossible to keep getting townships 36 miles square, because they would run out of land as township lines converged toward the north pole.

On the north and west of most plat maps there are land divisions with odd acreages. Sometimes these are called government lots (they were given a lot number), and sometimes left as "Fractional Forties" or "Fractional Eighties." The original surveyors decided whether to call them government lots or fractional forties and eighties.

The odd acreages resulted when the surveyors adjusted for land shortages as they went north, by making fractional forties, eighties, or government lots out of land on the west and north sides of a township to keep east and west lines parallel.

Not all townships are uniform in size. A river, for example, can separate counties and a township. Wherever the land is, the section, township and range numbers remain the same for purposes of land descriptions.

Every township has a township number and a range number (sometimes more than one of each if the township is oversized, or if is a combination of more than one township and range.) The township number is the number of rows or tiers of townships that a township lies, either north or south of the base line. The range number is the number of rows or tiers either east or west of the principal meridian.

ALL LAND DESCRIPTIONS SHOULD SHOW THE SECTION, TOWNSHIP AND RANGE IT IS LOCATED IN.

WHAT IS MEANDERED WATER?

A meandered lake or stream is water next to which the adjoining land owner pays taxes on the land only. This land is divided into government lots. The original government surveyors determined the location, acreage, and lot number of each tract.

Your county courthouse contains the original survey of your county (showing townships, government lots, meandered water, etc.) and it is on that survey that all land descriptions in your county are based.

NOTE: The government lot number assigned to a parcel of land is its **Legal Description**.

DETERMINING WHETHER WATER IS MEANDERED OR PRIVATELY OWNED

If you find government lots adjacent to a body of water or a stream, those waters are meandered. If there are no government lots adjacent to the water, that water is privately owned. The owner pays taxes on the land under the water, and also controls hunting, fishing and trapping rights on the water, within State and Federal law, EXCEPT where such water is deemed navigable, when other rulings may apply.

Generally, meandered water may be used by the public for recreational purposes, provided there is legal access to the water (i.e. you can get to the water without trespassing.)

WHY — and HOW — do you receive your copy of this County Farm Directory FREE? The answer is

GOOD WILL

And Friendly Co-operation

- The many business and professional firms who through their advertisements have made this book possible for you, know that a directory so completely compiled is valuable to its thousands of readers.

- They know that the persons listed in this directory are important, thoughtful citizens who are the most valuable friends any business can have.

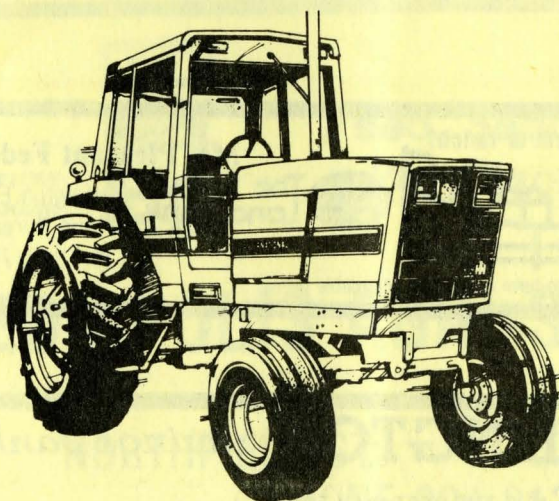

- They know that their investment will pay dividends by continuing the spirit of good will, confidence, and co-operation between the business man and the farmer.

- The SPONSORS of this book - the ADVERTISERS - can supply your requirements with the best in quality, price and service. The fact that they stand behind their product with their signature is proof of their integrity When buying mention your "FARM DIRECTORY" to them.
