DISTRICT HIGHLIGHTS 1960

1. Diamond Lake Watershed soil conservation survey completed.
2. Application for Public Law 566 Watershed made to Iowa State Conservation Commission.
3. Conservation field work delayed by late spring and wet weather.
4. Conservation week observed with special emphasis in County newspapers, radio & T.V.
5. Queen of Conservation candidates--Joan Dale & Sylvia Roshek chosen to represent County at Regional contest.
6. Conservation Award winners selected and honored at Grinnell Kiwanis luncheon.
7. Conservation work in the field picks up momentum with ideal late summer & fall weather.
8. Tiling in 1960 exceeds all previous records with 3/4 million feet installed.
9. Conservation library material distributed to public schools of county.

COVER: Building diversion terrace, Claire Wemer farm, 5 mi. N. E. Montezuma.

FORWARD

Accomplishments reviewed in this booklet represents another milestone in conservation for Poweshiek County.

The Soil District Commissioners in presenting this Report desire to again emphasize the extreme need of conserving Poweshiek county soils. We wish to recognize good conservation work, to encourage still more farmers to use conservation and to inform the public of the activities of their Soil Conservation District.

DISTRICT COMMISSIONERS & STAFF

CONSERVATION ACCOMPLISHMENTS FOR 1960

POWESHIEK COUNTY SOIL CONSERVATION DISTRICT

Enough tile to extend from Montezuma to the Missouri river was laid in Poweshiek County during 1960. In other terms 142 miles--749,066 feet were installed. This topped 1959 tiling by approximately 100 percent.

Structures built in 1960 were up 61 percent, 18 being installed.

The total length of gullies filled, shaped and seeded for grassed waterways would cross the county from east to west.

Almost 2000 acres of new contour farming was staked in the County.

This was added to an estimated 24,000 acres of contouring already on the land.

Approximately 8 miles of diversion terraces were built to shorten hillside slopes and protect bottomland from overwash. This is 15 percent more than 1959.

Ponds were built on 23 Poweshiek County farms and equal number were stocked with black bass, bluegill and channel catfish, obtained from the Federal Fish and Wildlife Service.

Almost 1000 acres of Poweshiek County pasture land was improved by renovation and seeding to improved pasture plants, such as birdsfoot trefoil, alfalfa, brome

and orchard grass.

Complete conservation plans were developed on 37 farms with the assistance of SCS District technicians.

This free planning service includes a complete soil map of the farm showing soil type, percent slope, amount of erosion, and the assistance of a trained conservationist in planning and applying contouring, strip cropping, terraces, waterways, ponds, structures, tile and cropping system.

The District received requests from 25 farmers for such conservation assistance.

ACCOMPLISHMENT SUMMARY

1. TERRACES & DIVERSIONS	7.64 Miles
2. PONDS COMPLETED	23 No.
3. STRUCTURES	18 No.
4. CONTOUR FARMING	3,210 Acres
5. STRIP CROPPING	1,935 Acres
6. WATERWAYS	102 Acres
7. TILE	141 Miles--749,066 Lin. Ft.
8. WILDLIFE BORDER IMPROVEMENT	1,738 rods
9. WILDLIFE AREA	321 Acres
10. PASTURE PLANTING	988 Acres
11. GRASS LAND RENOVATION	165 Acres
12. PONDS STOCKED WITH FISH	23 No.

D.C.-1 Designed for the dollar conscious swine raiser

Any swine producers goal is to make as much profit as possible. Swine feed represents 75 to 80 per-cent of the cost to market hogs, he naturally looks for the program, that will produce pork the most efficiently and economically. This is why thousands's of corn belt swine raisers, have switched to Walnut Grove's D. C.-1--life cycle--swine feeding program--because they know D. C.-1 is not just a collection of feeds. Rather it is a scientifically planned system that covers all the nutritionally vital periods in the life cycle of the hog--from breeding to gestation on through growing and finishing. Moreover, D. C.-1 is practicable, and flexible as well as economical. Let your man from Walnut Grove show you what this new D. C.-1 swine program can mean to you.

MALCOM, IOWA

WINNERS OF POWESHIEK COUNTY'S 1960 CONSERVATION AWARDS PROGRAM

tinued since 1944 by son Harold.

Conservation practices on the farm are completely re-organized fields, crop rotation including brome-al-falfa, (McLennan was among the first to use Fischer variety brome grass). contour cultivation, strip cropping, & some of the first standard and diversion terraces in the county.

W.S. MCLENNAN

W. S. & Harold McLennan, winners, Division I (owner-operator) of the 1960 Poweshiek Soil Conservation Achievement Program. Division I recognizes farmers for consistent long time practice of conservation and for completeness of program.

McLennan's are conservation pioneers in poweshiek Co. having followed conservation farming for the past 19 years.

The 200-acre McLennan farm is located 2 miles north of Hartwick. Conservation was begun by the elder Waldo McLennan and has been con-

Even with the numerous conservation practices already on the farm McLennan plans to add further terracing and waterway improvements.

**HAROLD
MCLENNAN**

Benedict Peterson, Oskaloosa, landlord and Milfred Neuhaus, Deep River, tenant are winners in Division II, Poweshiek County Conservation Awards Program.

The class is for landlords and tenants who have done an outstanding job through joint efforts in conserving soil and water.

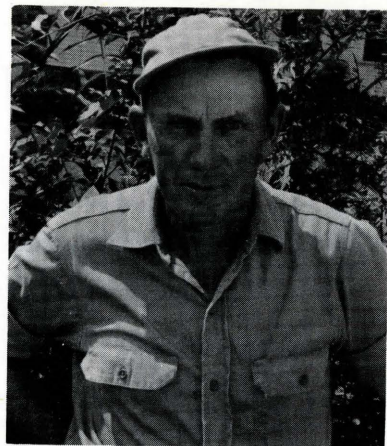

MILFRED NEUHAUS

On the Peterson farm square and rectangular fields have been completely re-organized to fit soil types, land contour and rotations.

Over 100 acres is strip cropped. A ditch has been straightened and tiled, many waterways filled shaped, tiled, and seeded, a farm pond constructed and over 1 1/3 mile diversion terrace built.

Neuhaus and Peterson have

been tenant and landlord for the past 10 years.

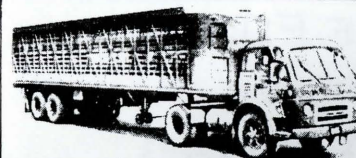

ELMER A. URFER

Elmer A. Urfer, Malcom, was declared winner in Division III (rapid progress) in the Poweshiek County Conservation Award Program. The award recognizes farmers who have made the greatest progress in the last 2 years.

Urfer owns and operates a 120 acre farm 6 miles north east of Montezuma.

All crops are contour farmed, 50 acres are strip cropped, almost a mile of standard terrace has been built and 700 feet of diversion terrace was completed this spring. Square and rectangular fields have been partly re-arranged to fit the contour pattern and soil needs.
