UNITED STATES DEPARTMENT OF AGRICULTURE

This agreement is entered into this 24th day of August, 1987, by and between the Hardin County Soil & Water Conservation District (District) and the United States of America, acting by and through the Soil Conservation Service, United States Department of Agriculture (Service), to provide federal financial assistance to the District.

I. Authority

Food Security Act of 1985, 16 U.S.C. § 3801 et. seq., and the Soil Conservation and Domestic Allotment Act, as amended, 16 U.S.C. § 590 a-f. This is a cooperative agreement as defined in the Federal Grant and Cooperative Agreement Act, 31 U.S.C. § 6301 et. seq., and Office of Management and Budget Circular A-102.

II. Purposes and Objectives

Under the provisions of Title XII of the Food Security Act of 1985, the Service is assigned responsibility to make determinations relating to identification of highly erodible lands and wetlands and to assist owners and operators with the development and implementation of conservation plans and systems. The District is a subdivision of state government empowered under state law to establish and administer a program of soil and water conservation. Under Title XII of the Food Security Act, conservation districts are assigned responsibility for approving conservation plans and systems. This agreement is intended to further the implementation of the Food Security Act.

This agreement will (1) assist the District in gathering facts and in preparing documentation to form the basis for determinations of highly erodible land, wetlands, converted wetlands and minimal effects of wetland conversion and (2) assist the District in providing assistance to landowners and landusers in the development and implementation of conservation plans and systems. This assistance will more rapidly implement the conservation provisions of the Food Security Act of 1985.

III. The District Agrees to do the Following:

- A. To perform any or all of the following items of work as designated by the Service:

- E. Comply with the nondiscrimination provisions of Title VI of the Civil Rights Act of 1964, and other nondiscrimination statutes namely, Section 504, Title IX, and the Age Discrimination Act of 1975, and in accordance with the regulations of the Secretary of Agriculture (7 CFR-15, Subpart A & B) which provide that no person in the United States shall, on the grounds of race, color, national origin, age, sex, religion, or handicap, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving federal financial assistance from the Department of Agriculture or any agency thereof.
- F. Give the Service or the Comptroller General, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to this agreement.

IV. The Service Agrees to do the Following:

- A. Provide technical supervision, guidance and training as determined by the Service to be adequate to enable the District to carry out its responsibilities under this agreement. If the Service is unable to maintain such support, the District's requirements will be adjusted by mutual agreement.
- B. Advance assistance funds to the District pursuant to this agreement with requests submitted on Standard Form-270. Advances will be made to satisfy immediate disbursement needs on a monthly basis. However, the Service may make disbursements at any time it determines it to be necessary to facilitate the purposes of this agreement.
- C. Upon notification of the completion of an item of work, the Service shall promptly review the performance of the District to determine if it has met the specifications for that item. Approval of such performance shall be required prior to such item being charged against assistance advances.

V. It is Mutually Agreed:

- A. The total amount of assistance which may be provided to the District under this agreement is \$ 15,000.00 ^{enc} _{RS m} _{9/10/87}
- B. This agreement shall be effective on the date appearing in the first paragraph and shall continue in effect through September 30, 1988. It may be renewed for subsequent fiscal years by an exchange of correspondence between the state conservtionist acting for the Service and the chairman of the District Board acting for the District.
- C. This agreement may be terminated by either party hereto by written notice to the other party at least 30 days in advance of the effective date of the termination.
- D. It is the intent of the Service to fulfill its obligations under this agreement. However, the Service cannot make commitments in excess of appropriated funds authorized by law or administratively made available. If the Service cannot fulfill its obligations because of lack of appropriated funds, this agreement will automatically terminate.

- D. The term "Conservation planning" means the gathering of information and preparation of materials for use in development of conservation plans, in conformity with the local SCS Service field office technical guide, for individuals or groups; and arranging for and conducting group conservation planning meetings.
- E. The term "Determination" means a decision by the Service, under 7 CFR Part 12, on the identification of highly erodible lands, wetlands, converted wetlands, and whether the conversion of wetland for agricultural commodity production would have a minimal effect on the hydrological and biological aspect of wetland.
