

Soil Conservation Week September 19 - 25

No-till Planting Saves Soil, Time!!

Planting crops by the no-till or minimum-till methods aren't experimental ideas anymore. They're here and being used by some of Clarke County's most successful farmers as a way to conserve soil, save production costs and increase profits.

There's a no-till or minimum till field near you.

Look it over and talk to the farmers who are doing it. You'll know someone on the following list of Clarke County no-till or minimum-till farmers.

(Information provided by the Clarke County Soil Conservation Service)

MADISON

Kilpatrick Farms
Louisa Symington
Wayne Kirk
Merrill Spellerberg
David Hodnefield
Larry Fitzgerald
John Govern
Syd Shell

TROY
